

Intake Program

INITIAL INTERVIEW

In order to provide you with high quality service, we offer an initial interview with parent/ guardian to get to know your child and family and further understand what your priorities are for therapy. If you are new to the NDIS we can help you understand how to maximise utilisation of your plan and understand more about the services we offer. We aim to minimise the number of times you need to repeat your story and have all the information pertinent to your child when you commence service with us.

REVIEW BY SENIOR THERAPIST

Once this interview has been completed, the intake information is reviewed by a senior therapist who will look at all the information provided along with any other professional reports you have been provided with and make recommendations for further assessment, along with strategies you may be able to commence immediately and other resources you may be able to utilise in order to support your child. We can also make referrals to other relevant professionals if required.

RECOMMENDATIONS, REPORT AND FEEDBACK SESSION

Our intake team will prepare a report including recommendations and a summary of your goals for therapy and priorities to support your child. The report will give you some practical strategies and suggestions to start with prior to commencing therapy services with Flying Start Children's Therapy.

COST OF INTAKE PROGRAM - \$700.00

The cost of the intake program includes:

- ◆ Initial interview (60 - 90 mins)
- ◆ Review by senior therapist
- ◆ Report including summary and recommendations
